

# TCLL Sprinkler Reference Chart

Question on Settings? Call (817) 281-8986 Business Office

**Disclosure Statement:** Please be advised that TCLL does **NOT** assume responsibility for adequate watering of your property. This chart and its detail have been developed for your convenience. The setting and schedule below have been programmed on your system. We do not insure that these settings will be a success. Please check your yard for proper coverage and saturation weekly. Regular adjustments and changes in this schedule are required as plants grow and seasonal rain and temperatures change. If you would like our assistance throughout the year or have any concerns, please contact our offices. All schedules should be changed a minimum of three times a year. We recommend a Wireless Rain/Freeze Sensor – please contact our office if you do not already have one and are interested in more information. Please check batteries regularly. If you experience a power outage your battery is the only thing that will allow your sprinkler controller to retain its program. Thank You.
